Mihir Sahu

+1 (508) 654-2161 | mihirs1410@gmail.com | github.com/MihirSahu14 | https://www.mihirsahu.dev/

Education

University of Wisconsin–Madison Sep 2022 – May 2026
B.S. Computer Science & Data Science; Certificate in Game Design *Madison, WI*
- Dean's List: Fall 2023
- Relevant Coursework: AI/ML, Data Modeling and Programming, Machine Organization, Operating Systems, Data Structures & Algorithms, UI/UX Development, Database Management System, Game Design, Statistics,

Technical Skills

Languages: Python, JavaScript, TypeScript, C/C++, C#, Java, SQL, HTML/CSS, Bash, R
Frameworks & Libraries: React, Next.js, LLMs, RAG, FastAPI, Flask, Django, Node.js, PyTorch, LangChain, OpenCV, Pandas, NumPy
Tools: Git, Docker, AWS, GCP, PostgreSQL, MongoDB, REST APIs, OpenAI API, Anthropic API, Supabase, Vercel, Linux, Unity, Kafka, Web3, Godot

Experience

allNeurons Sep 2026 – Oct 2026
AI Engineer *Santa Clara, CA*
- Built multi-agent workflows that turn HVAC clients' site-walk photos and field notes into asset lists and technical assessments, cutting assessment time from 2 weeks to under 2 hours.
- Built SSO with role-based access, OpenTelemetry ingest and per-run skill tracking for an AI-ROI SaaS, powering team leaderboards, ROI dashboards and auto-alerts for newly detected skills.
- Engineered self-learning loops that upgrade agent skills from user edits, and wired agents into live Salesforce and Snowflake data.
- Delivered 20+ agent skills, 6 data connectors and a voice sales agent across 3 client deployments.

Capital One Feb 2026 – May 2026
Software Engineer Intern (Capstone) *Madison, WI*
- Architected a serverless fraud detection system within a 5-person Agile team, cutting manual review time by 30% through automated model scoring.
- Prototyped an asynchronous 0–1 scoring pipeline that increased transaction throughput by 150% and enabled real-time fraud decisions; validated riskiest assumptions via Google Design Sprints.

Sprocket Lab Sep 2025 – May 2026
Research Assistant, AI Department *Madison, WI*
- Built a multi-level RL environment for autonomous quadcopter navigation, integrating vision-language model control and weak-supervision pipelines to enable hierarchical policy learning.
- Trained and evaluated agents across 100+ randomized episodes using depth-camera input, achieving consistent navigation performance; automated experiment pipelines to accelerate iteration.

AIMitari MedTech Pte Ltd Jun 2025 – Feb 2026
Software Engineer Intern *Singapore*
- Developed an AI-assisted ultrasound guidance system that learned clinician-defined scan trajectories, enabling non-experts to reproduce expert-quality scans with high spatial fidelity.
- Built a real-time perception pipeline for landmark detection and adaptive probe navigation; reduced operator error by algorithmically constraining probe motion.

Projects

Intern | *Next.js, TypeScript, Convex, Claude API* | intern-brain.vercel.app Aug 2026 - Present
- Built a shared knowledge base for AI agents that learns continuously from a community's Slack, documents and GitHub, so agents draft from what the team already knows.
- Added an approval step where agents draft emails and Slack messages and send them only after a person approves; the edits made before approving are saved and given to the next agent, so it gets it right sooner without any retraining.

GameGold | *Next.js 16, FastAPI, LiteLLM, MongoDB, Unity (C#)* | gamegold.vercel.app May 2026 - Present
- Built and published 6 games in 6 genres to itch.io in one day, each built in Unity, playtested by AI agents and taken through 5 evidence-gated stages from pitch to ship.
- Engineered a C# MCP bridge inside the Unity Editor that lets the browser create scenes, GameObjects, scripts and sprites, enter Play mode, build for WebGL and publish to itch.io, eliminating manual Unity setup.

Achievements

Play Make Learn 2026 | Paper accepted: Social Pandemic: a board game approach to tackle disinformation in science communication
Toxify Game Jam 2026 | Selected as a Finalist in the 19th annual Life Love Game Design Challenge out of nationwide studio submissions for Ripple, a narrative Unity game
